Gos 131 Mission Union Begins Its Maryland Authorities Refuse Many Washingtonians Registration.

> Strict Enforcement of the Law in Nearby Counties Causes Consternstion in the Camp.

The rigid enforcement of the registration laws in Maryland has attracted much interest among local politicians in this city, to say nothing, in many instances, of disappointment and dismay.

The custom has prevailed during two
or three score of years for large numbers
of voters living in the District to certify
themselves as being legal residents of the

adjacent counties in Maryland, and a sufficient force of these transient citizens cast their ballots in Montgomery and Prince George's Counties to change the political complexion of those counties. political complexion of those counties.

For the purpose of carting off this source of outside assistance the Maryland legislature recently enacted a stringent registration law, which, of course, is applicable to the whole State, but has its visible effects mainly in the counties mentioned. As a consequence many embarrassing and ludicrons situations have arisen and several politicians have found themselves in the possible of the man whose

selves in the position of the man whose house was blown away by a cyclone while

he slept.

As an illustration, B. H. Warner, the popular president of the Board of Trade, has a summer residence at Kensington, and was chiefly instrumental in building up that flourishing suburb. He has been up that flourishing suburt. He has been prominently mentioned as a possible Republican Congressional nominee in the Sixth district, where George L. Wellington, a Republican, was caseen at the last election. But when the preliminary steps necessary to casting his ballot as usual at the Wheaton voting precinct were taken he was not allowed to register. This throws him out of the political arenaunless he shall hereafter re-establish his legal residence in the district.

A more line ingruous instance, and one which is occasioning much gossip, is the refusal of registration to Tom Noyes, who is chairman of the Montgomery County Republican committee. This places the committee in a headless attitude, and is considered by the Democrats as an unusually good joke.

sidered by the Democrats as an unusually good loke.

Among other leading Republicans who have been refused registration are Crossly, Frank and Theodore Noyes, who have all heretofore maintained a legal residence in Montgomery County. It is estimated that fully 800 voters living in Washington who have in previous elections cast their ballots in that county alone have been cut-off by the view of the register. off by the vigorous enforcement of the regis-

UNDERGROUND FIRES

Curious Feature of the Recent Drought

in New Jersey. Mount Holly, Oct. 14 .- A curious feature of the drought which prevailed in this vicinity is the underground fires that have raged without abatement on several farms, doing incalculable damage, destroying fences, robbing the land of its vitality, burning off the roots of large trees, and in various other ways causing the farmers to fear that much of their land will be made useless for growing crops, timber, fertil trees of

The first of the subterranean fires was dis covered on George Wells' farm, near Colum-bus. The tenant, I. N. Armstrong, was the bus. The tenant, I. N. Armstrong, was the first one to have his attention attracted to the phenomena, he having noticed small columns of smoke issuing from the ground at different places on a piece of meadow or pasture land, and later flames. The flames postersed no illuminating qualities, but passed of considerable heat, as is the case with all flames of a gaseous nature. An investigation then followed. It was finally concluded that the fire originated from spontaneous combustion. There had been no fires of any kind upon the surface

of the tract, and a surface fire would hardly have pecetrated to a depth of eight or nine inches.

nine inches.

The intensity of the heat generated may be gathered from the fait that the ground at the surface was literally baked, and caused many cracks or crevices, through which the fire and smoke issued. The roots of large trees were reduced to ashes, causing them to fall over.

All efforts to extinguish the strange conflagration have thus far proved fruitless. As fast as it was dug out and extinguished with water and sand it would break out at another place, until the men gave up the
